

# FUNKY FRIDAYS

(A trading name of Primrose Weddings and Events Ltd)

## Environmental & Sustainability Policy

Issue Date	December 2025
Review Date	December 2026
Version	1.0

### Policy Statement

Funky Fridays is committed to operating responsibly and reducing the environmental impact of our catering activities. We aim to make practical sustainable choices in sourcing, operations, waste reduction and logistics while maintaining high standards of food and service.

### 1. Sustainable Sourcing

Prioritise local and regional suppliers wherever practical; use seasonal produce; reduce reliance on high-impact ingredients; include plant-forward menu choices.

### 2. Food Waste Reduction

Use our daily menu ordering system to align production with demand and minimise overproduction; use forecasting and batch cooking; monitor uptake and reduce waste.

### 3. Packaging & Consumables

Minimise single-use materials and use recyclable or compostable disposables wherever practical.

### 4. Energy & Equipment

Use efficient modern equipment, including electric catering equipment where practical, and reduce unnecessary energy consumption.

### 5. Transport & Logistics

Plan consolidated deliveries, source close to location using our UK supplier network, and reduce unnecessary transport.

### 6. Continuous Improvement

Review practices regularly and continue improving measurement and reduction of environmental impacts over time.

### Responsibility

Responsibility for implementing this policy sits with management and all team members are expected to support these commitments through day-to-day operations.
